 Top 5% or better of the Angus Breed

 Top 10% or better of the Angus Breed

 Top 20% or better of the Angus Breed

We are particularly proud of this draft of Hazeldean Angus bulls - they represent our breeding programme perfectly.

Their average EBV's show outstanding calving ease, low birth but high growth, scrotal size average nearly double the breed average, and their carcase EBV's are stand out as well. They are mostly positive for fat, and most are in the top 20% or better of the breed for IMF.

Their indexes are outstanding, with the average in the top 15% of the breed.

These young sires have stacked on the weight in the last couple of months and are ready to work and take your herd to the next level.
