## Hazeldean Merinos Monaro Ram Sale 2019

Thursday 31st October  
Hazeldean, Cooma, NSW  
Commencing 1pm

# HAZELDEAN MERINOS MONARO RAM SALE 2019

Inspections from 9.30am  
Thursday 31st October  
Hazeldean, Cooma, NSW  
1pm

**250 Merinos  
Poll & Horn**

## Enquiries:

Jim Litchfield: 02 6453 5555 | 0417 676 561  
Bea Litchfield: 02 6453 5555 | 0427 933 103  
Ed Bradley: 0412 298 546

Catalogue can be viewed online on Sheep Genetics Website  
and through RAMSELECT

Morning Tea & Lunch provided by Cooma Pony Club  
Be sure of a catalogue – Bring this one with you

**[www.hazeldean.com.au](http://www.hazeldean.com.au)**

Dear Merino Clients,

We welcome you to our Spring ram sale for 2019. For the past 5 months the rams have been run in large mobs on crops and have developed into an impressive team despite the current climate. This year's sale team are very well grown, sound bodied rams ready to impart their high performing genetics to your flock.

With what has been yet another very tough year across many parts of the country, genetic value in the ewe base is as important as ever. Having superior genetics in your flock means extra profit from the same inputs, particularly the cost of feed. For Hazeldean blood flocks this means greater profit in the form of wool clip value but Hazeldean sheep also give market flexibility and options. A strong ewe base with heavy cutting, high value wool producers will breed on to produce higher performing wethers and/or replacement ewes to be used as a valuable component of a prime lamb enterprise.

This years Hazeldean ram team will complement a variety of enterprises and mixes of enterprises by creating a productive, profitable ewe base to maximise fibre production. The performance of these rams is unrivalled with the average MP+ index of the entire team in the top 10% of the industry.

Standouts sires in the catalogue include HAZ12004030, YALGOO160070, HAZ HUGH11003542 and young upcoming Hazeldean sires HAZ16002777, HAZ16000113, HAZ16000183 and HAZ16000128.

We look forward to catching up with you on sale day.

Regards,

Jim and Bea Litchfield

## Stud History

With the acquisition of Rambouillet and Tasmanian bloodlines, James Litchfield established the Hazeldean Merino Stud in 1865. Occasional introductions based on Riverina Peppins occurred between the 1800's and 1958, when the Stud was closed. In 2000 the stud was reopened to access outside rams that have performed better than Hazeldean rams in Central Test Sire Evaluation and Sheep Genetics evaluation.

Hazeldean is a distinct strain of Australian Merino noted for its constitution, large frame and reputation in bloodline comparison trials, where it consistently demonstrates an ability to turn grass into dollars more effectively than other bloodlines. Hazeldean blood performs at the top in all major wool growing areas of Australia, and generally surpasses all other studs in profitability analyses.

Hazeldean has been under the direction of the Litchfield family for five generations and is one of the nation's oldest studs. It is also the oldest performance-based Merino stud in Australia.

In 1954 the Stud pioneered the adoption of a selection system based on measurable, commercially relevant traits, essential to the maximisation of profitability. The same system, although much enhanced through modern technology, remains the cornerstone of the Stud today.

## The Hazeldean Breeding Policy

The special treatment of small groups through shedding and provision of artificial ration is at odds to the philosophy of the Stud. To give accurate and meaningful measurement information, it is necessary to evaluate animals by running them in large contemporary groups under conditions equivalent to those experienced in the world of commercial wool growing. Hazeldean therefore runs its stud operations along the lines of a commercial wool growing and breeding enterprise.

Hazeldean bases its selection decisions and grading for sale on a measurement system that has been in place for many years. Measurement, when applied with common sense, significantly improves the accuracy of selecting for heritable traits of economic importance such as fleece weight and fibre diameter.

## Hazeldean Flock Health Status

The Hazeldean flock is assessed under the National Johne's Disease Market Assurance Program and holds a status of Monitored Negative 3 Vaccinated (MN3-V).

The Hazeldean flock is also accredited as Brucellosis free.

Although Hazeldean employs best practice procedures in livestock husbandry and does its best to ensure every animal catalogued for sale is free from disease, internal parasites and external parasites, it does not guarantee that any sale animal is free of disease, internal parasites or external parasites.

## Explanation of Terms Used

### To Express Measurement Details

An estimation of each ram's genetic worth relative to the average of his contemporaries is provided on each sale lot.

The measurements in the catalogue refer to the Australian Sheep Breeding Values (**ASBVs**) for each animal. An index and rank value are also included.

#### Australian Sheep Breeding Values (ASBVs):

ASBVs describe the expected performance of a ram's progeny. Although actual measurements of fleece weight, fibre diameter etc are a good guide to the performance of the ram's progeny, adding the measurements of relatives to the calculation allows the likely breeding value of the ram to be more accurately represented.

**Accuracy** is represented as a percentage and is a reflection of the amount of information that is available to calculate the ASBV.

**FD (Dev)** - (Fibre Diameter Deviation) - Represents the difference in fibre diameter measurement relative to other animals included in Sheep Genetics evaluation. The measurement is established by assessing a small sample of the fleece taken from the mid-side or the hip of the ram as well as including fibre test information on all relatives tested including brothers, sisters, parents, uncles, aunts etc. A negative figure indicates the ram is estimated to breed finer than average, a plus sign indicates the ram is estimated to breed stronger.

**CFW (Clean Fleece Weight)** – Rams with a higher clean fleece weight are estimated to produce progeny that cut more wool. Again this is assessed by weighing the fleece of the ram and including fleeceweights taken on all relatives

#### FDCV% (Co-efficient of Variation of Fibre Diameter)

It is impossible for sheep to have all their wool fibres exactly the same micron – the fibres on a sheep's back vary from fine to strong and the FD measurement is an average of all these fibres. However, some animals have less variation than others and are described as having lower fibre diameter coefficient of variation (FDCV). A lower CV% is often associated with higher staple strength therefore sheep with a small variation about the average are described as having “a good CV”. CV is also important as wool can be spun into a finer yarn if it has a low CV.

**WT(kg)** – Animals with a more positive ASBV for weight will produce lambs that grow faster and therefore reach target weights in a shorter period of time.

## Index Values

Each sale ram has an index describing its overall value. The index includes the traits of most value in Merino sheep (such as fleece weight and fibre measurement) and puts them together into one figure. This makes selection easier as it removes the need to weigh up fleece weight and fibre measurement independently when selecting rams.

It is also possible to put more emphasis on reducing fibre diameter, increasing fleece weight (or vice versa) or improving any other characteristic through the use of an index. This can be done by applying different weightings to each trait when calculating the index.

For example, as Hazeldean wishes to reduce fibre diameter at a faster rate than lifting fleece weight, we place a 7% premium on the value of fibre diameter in the calculation of our index. We also want to improve staple strength. Because Co-efficient of Variation (CV%) is correlated to Staple Strength, the Hazeldean Index places emphasis on lower CV% as a means to improve this trait.

Index Value's in this catalogue therefore represent each ram's combined performance for all measured traits plus information gathered on all measured relatives.

## Information from Relatives

We all know that some rams will breed worse than they appear and some will breed better. This is either due to the influence of environment or genetics.

In the instance of **environment**, for example, rams that spend their entire lives in the ram shed and fed special rations each day are more likely to breed worse than they appear whereas rams who are weaned early, spend their first year in drought and go without a drop of TLC from then on are more likely to breed better than they appear.

In the instance of **genetics**, a high performing ram coming from a long line of high performing animals is more likely to breed better than a high performing ram coming from a line with low performing animals in it. If information on relatives (brothers, sisters, aunts, uncles, grandparents as well as sire and dam) is included in the assessment of an animals index, the likelihood of the ram having an accurate index ranking reflecting his true value, is much enhanced.

## Semen Sales

Semen is available from our top sires. Hazeldean retains semen rights on all rams unless otherwise agreed upon, according to Hazeldean Semen Terms & Conditions on the website. [www.hazeldean.com.au](http://www.hazeldean.com.au)

A current list of our semen sires is available on our website: [www.hazeldean.com.au](http://www.hazeldean.com.au) on our **Merinos page** or contact Jim Litchfield on 02 6453 5555.

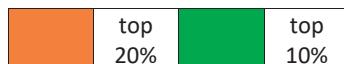

The Hazeldean sale rams are amongst the top end of all industry rams. The average ASBV's across the whole sale team are far superior to the industry average for fleece weight, fibre diameter and the FP+, MP+ and DP+ indexes. They will greatly increase fleece weight and improve wool quality.

*This year's group of Auction rams has an average MP+ Index of 166.3% which puts the average of these rams in the top 10% of industry as a group. It would be very hard to find a line up rams elsewhere with this type of performance.*

The spread of breeding values on the rams are industry leading; coupled with the type and style of the rams, they are balanced to boost your bottom line.

## Hazeldean Ram Sale Average ASBV's compared to Industry

	YFD	YCFW	YFDCV	YWT	YSS	MP+
Average ASBVs 2019 HZ SALE TEAM	-2.0	21.7	-0.4	3.4	-1.2	166.3
Average ASBVs 2018 drop SHEEP GENETICS	-1.1	15.2	-0.7	3.2	0.6	140.9

**Hazeldean Rams cut more wool that is of higher value, on sheep with lower maintenance requirements, giving more profit per hectare.**

Rams will be available for private selection following the sale or any other time by appointment.

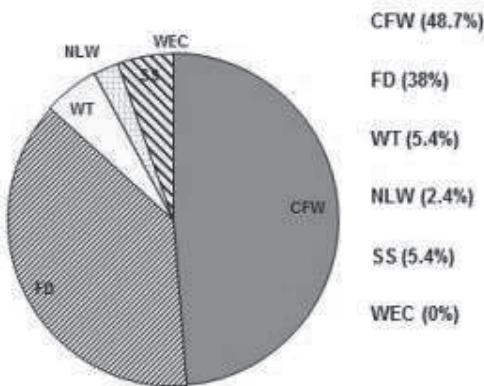

## Trait contribution to profit

We have been utilising the **7% index** over the last couple of years in order to distribute the selection pressure to **increase wool cut** and **lower micron** with a slight boost to live weight. Staple strength is not forgotten but is maintained to be slightly improved.

The **2017 sale rams were graded using the 7% index** as well as being assessed for **soundness and wool quality**. It's exciting times for the stud with many of our sale rams trait leaders across the industry.

With the introduction of full pedigree and the integration of genomic technologies – we're busy –and it's rewarding to see **our genetics are unparalleled in improving your flock's profitability**.

## Directions to Hazeldean from Cooma

If you are entering Cooma from the Canberra (Eastern) end turn left at the first roundabout in the centre of town by the park. If entering from the Jindabyne (Western) it will be a right turn at the second roundabout. Follow this street, Bombala St, (also the Snowy Mountains Highway to Bega and the South Coast) until you reach a bridge over the Cooma Creek on the outskirts of town. Turn right just before the bridge. The sign says Bobundara 34 and also Church Rd.

Follow this road exactly 14kms from the turn and the Hazeldean mailbox and entrance is on the right - about 1 km past the only bridge you cross on the Bobundara Rd.

### Airports

Hazeldean is located 1.5 hours' drive south of Canberra near Cooma. There are daily flights from all Capital cities to Canberra airport. Hazeldean is 20 minutes from the Snowy Mountains/Cooma Airport which is all weather and has lights. For privately chartered aircraft please contact 02 6452 5999 for more details.

### Where to stay

#### Altair Motel

192 Sharp Street  
02 6452 1211

#### Nebula Motel

42 Bombala Street  
02 4552 4133
